Alert-iT are committed to preventing disclosure of held data and to complying with all statutory and regulatory legislation in accordance with GDPR requirements.

**Key details Context & Overview**

- Policy prepared by: George Pawlak
- Approved by Board / Management on: 26/04/18
- Policy became operational on: 27/04/18
- Next review date: 14/01/21

**Introduction**

Alert-iT needs to gather and use certain information about individuals. These can include customers, suppliers, business contacts, employees and other people the organisation has a relationship with or may need to contact.

This policy describes how this personal data must be collected, handled and stored to meet the company's data protection standards – and to comply with the law.

**Use of Data**

Alert-iT keeps customer data for reasons of;
- Accounting - once an Alert-iT product has been purchased
- Support- to help manage during product warranty and our valued telephone support
- Keeping customers up to date with new development.
Private customers, Alert-iT will not use this data for any marketing activity, they will only be contact on the request of the customer or for a necessary support issue on the purchased product.

Commercial customers, Alert-iT will use customer data for marketing activity with the aim in growth of business. Customers will always have the opportunity to unsubscribe permanently from any marketing campaign.

Why this policy exists

This data protection policy ensures Alert-iT:

- Complies with data protection law and follows good practice
- Protects the rights of staff, customers and partners
- Is open about how it stores and processes individuals’ data
- Protects itself from the risks of a data breach

Data protection law

The Data Protection Act 1998 describes how organisations - including Alert-iT must collect, handle and store personal information.

These rules apply regardless of whether data is stored electronically, on paper or on other materials.

To comply with the law, personal information must be collected and used fairly, stored safely and not disclosed unlawfully.

The Data Protection Act is underpinned by eight important principles. These say that personal data must:

1. Be processed fairly and lawfully
2. Be obtained only for specific, lawful purposes
3. Be adequate, relevant and not excessive
4. Be accurate and kept up to date
5. Not be held for any longer than necessary
6. Processed in accordance with the rights of data subjects
7. Be protected in appropriate ways
8. Not be transferred outside the European Economic Area (EEA), unless that country or territory also ensures an adequate level of protection
People, Risks & Responsibilities

Policy scope
This policy applies to:

• The head office, located at Fernie House, Coalville, Leicestershire, LE67 3NR.
• All branches of Alert-iT.
• All staff and volunteers of Alert-iT.
• All contractors, suppliers and other people working on behalf of Alert-iT

It applies to all data that the company holds relating to identifiable individuals, even if that information technically falls outside of the Data Protection Act 1998. This can include:

• Names of individuals
• Postal addresses
• Email addresses
• Telephone numbers
...plus any other information relating to individuals

Data protection risks
This policy helps to protect Alert-iT from some very real data security risks, including:

• **Breaches of confidentiality.** For instance, information being given out inappropriately
• **Failing to offer choice.** For instance, all individuals should be free to choose how the company uses data relating to them
• **Reputational damage.** For instance, the company could suffer if hackers successfully gained access to sensitive data
Responsibilities

Everyone who works for or with Alert-iT has some responsibility for ensuring data is collected, stored and handled appropriately.

Each team that handles personal data must ensure that it is handled and processed in line with this policy and data protection principles.

However, these people have key areas of responsibility:

- **The board of directors** is ultimately responsible for ensuring that Alert-iT meets its legal obligations

- **The Alert-iT Data Protection Officer** Tony Bullars is responsible for:
  
  - Keeping the board updated about data protection responsibilities, risks and issues
  - Reviewing all data protection procedures and related policies, in line with an agreed schedule
  - Arranging data protection training and advice for the people covered by this policy
  - Handling data protection questions from staff and anyone else covered by this policy
  - Dealing with requests from individuals to see the data Alert-It holds about them (also called ‘subject access requests’)
  - Checking and approving any contracts or agreements with third parties that may handle the company’s sensitive data

- **The Alert-iT IT Manager** Joe Rider is responsible for:
  
  - Ensuring all systems, services and equipment used for storing data meet acceptable security standards
  - Performing regular checks and scans to ensure security hardware and software is functioning properly
  - Evaluating any third-party services, the company is considering using to store or process data. For instance, cloud computing services

- **The Alert-iT Directors** [Rick Gunn / Tony Bullars], are responsible for:
  
  - Approving any data protection statements attached to communications such as e-mails and letters
  - Addressing any data protection queries from journalists or media outlets like newspapers
  - Where necessary, working with other staff to ensure marketing initiatives abide by data protection principle.
General staff guidelines

• The only people able to access data covered by this policy should be those who need it for their work

Data should not be shared informally. When access to confidential information is required, employees can request it from their line managers

• Alert-IT will provide training to all employees to help them understand their responsibilities when handling data

• Employees should keep all data secure, by taking sensible precautions and following the guidelines below

• In particular, strong passwords must be used and they should never be shared

• Personal data should not be disclosed to unauthorised people, either within the company or externally

• Data should be regularly reviewed and updated if it is found to be out of date. If no longer required, it should be deleted and disposed of

• Employees should request help from their line manager or the data protection officer if they are unsure about any aspect of data protection

Data storage

These rules describe how and where data should be safely stored. Questions about storing data safely can be directed to the Alert-IT IT manager or data controller.

When data is stored on paper, it should be kept in a secure place where unauthorised people cannot see it.

These guidelines also apply to data that is usually stored electronically but has been printed out for some reason:

• When not required, the paper or files should be kept in a locked drawer or filing cabinet

• Employees should make sure paper and printouts are not left where unauthorised people could see them, like on a printer

• Data printouts should be shredded and disposed of securely when no longer required

When data is stored electronically, it must be protected from unauthorised access, accidental deletion and malicious hacking attempts:
• Data should be **protected by strong passwords** that are changed regularly and never shared between employees

• If data is **stored on removable media** (like a CD or DVD), these should be kept locked away securely when not being used

• Data should only be stored on **designated drives and servers**, and should only be uploaded to an **approved cloud computing services**

• Servers containing personal data should be **sited in a secure location**, away from general office space

• Data should be **backed up frequently**. Those backups should be tested regularly, in line with the company’s standard backup procedures
  Data should **never be saved directly** to laptops or other mobile devices like tablets or smart phones

• All servers and computers containing data should be protected by **approved security software and a firewall**

### Data use

Personal data is of no value to Alert-iT unless the business can make use of it. However, it is when personal data is accessed and used that it can be at the greatest risk of loss, corruption or theft:

• When working with personal data, employees should ensure the **screens of their computers are always locked** when left unattended

• Personal data **should not be shared informally**. In particular, it should never be sent by e-mail, as this form of communication is not secure

• Data must be **encrypted before being transferred electronically**. The It manager can explain how to send data to authorised external contacts

• Personal data should **never be transferred outside of the European Economic Area**

• Employees **should not save copies of personal data to their own computers**. Always access and update the central copy of any data

### Data accuracy
The law requires Alert-iT to take reasonable steps to ensure data is kept accurate and up to date.

The more important it is that the personal data is accurate, the greater the effort Alert-iT should put into ensuring its accuracy.

It is the responsibility of all employees who work with data to take reasonable steps to ensure it is kept as accurate and up to date as possible.

- Data will be held in as few places as necessary. Staff should not create any unnecessary additional data sets.
- Staff should take every opportunity to ensure data is updated. For instance, by confirming a customer’s details when they call.
- Alert-iT will make it easy for data subjects to update the information Alert-iT holds about them. For instance, via the company website.
- Data should be updated as inaccuracies are discovered. For instance, if a customer can no longer be reached on their stored telephone number, it should be removed from the database.
- It is the marketing manager’s responsibility to ensure marketing databases are checked against industry suppression files every six months.

**Subject access requests**

All individuals who are the subject of personal data held by Alert-iT are entitled to:

- Ask what information the company holds about them and why
- Ask how to gain access to it
- Be informed how to keep it up to date
- Be informed how the company is meeting its data protection obligations

If an individual contacts the company requesting this information, this is called a subject access request.

Subject access requests from individuals should be made by e-mail, addressed to the data controller at sales@alert-it.co.uk. The data controller can supply a standard request form, although individuals do not have to use this.

The data controller will aim to provide the relevant data within 14 days. If additional copies are requested, an admin fee may be charged.

The data controller will always verify the identity of anyone making a subject access request before handing over any information.
Alert-iT aims to ensure that individuals are aware that their data is being processed, and that they understand:

- How the data is being used
- How to exercise their rights

To these ends, the company has a privacy statement, setting out how data relating to individuals is used by the company.
