

P142A

P142A

Connect sensing lead lead to here (P141)

When using 2 core cable: Test alarm operation by joining these with a metal item (eg spoon, knife, paper clip). Failure to alarm may suggest the wires have broken in the washing.

Or

When using 4 core cable with the Guardian Monitor : Connect second pair here and the monitor will test the sheet integrity automatically

It is advisable to disconnect the sheet as soon as possible after an alarm is detected. Prolonged connection to Tunstall Monitors while damp can result in some cosmetic staining.

- Recommended wash at temperature of 60°C and do not tumble dry for maximum life (50 washes) but hang to dry.
- Acceptable wash at 85°C with medium heat tumble dry (30 washes)
- Do NOT use fabric softener (which makes unit waterproof)
- Using monitors other those from Alert-it can result in brown staining. Consult manufacturer for cleaning instructions if required.
